Ein Service der
LINZ AG LINIEN

Starting

Simply press the brake pedal and select the desired driving mode and the vehicle is ready to drive.

The gear shift lever is located behind the steering wheel on the right-hand side. There you can choose between the following functions:

D / B	D / B* = Drive
(P) -↕	P = Park
N	N = Neutral
R	R = Reverse

* enhanced engine braking, e.g., for downhill driving

Push the lever forward or backward to select the desired gear mode.

The electronic parking brake releases automatically as soon as you press the accelerator.

Commissioning and Return

After unlocking the vehicle, you can remove the charging cable. First disconnect it from the vehicle, then from the charging station. Please always take the charging cable with you.

Attention: The theft protection locks the cable after 30 seconds. If this happens, you need to lock and unlock the car again.

When returning the car to the tim hub, reconnect it: first to the vehicle, then to the charging station.

The charging process starts as soon as the vehicle is correctly connected. You can recognize this by the pulsing green light on the charging port and the fact that the cable can no longer be removed.

Charging on the Go

If you want to charge while on the go, please use the public charging stations listed in the LINZ AG charging atlas. You'll find the appropriate charging card in the glove compartment.

At www.linzag.at/ladeatlas you can easily find free public charging stations.

Parking

To park the vehicle, press the brake and push the "P" button located on the side of the gear lever. This also activates the parking brake.

Lights

To the left of the steering wheel, you can switch the lights on or off. Simply press "MODE" and select the required light setting. **Tip:** Use the "Auto" setting.

VW ID.3

Drive: Electric **Transmission:** Automatic **Seats:** 5
